

# Solubility System

## Model 238900

### SPECIFICATIONS

- Size: 3.5" H X 4.0" W X 10.25" L
- Weight: 4 lbs.
- Max. Time: 23 Hrs, 59 Min, 59 Sec.
- Power Supply: 115 Vac, 60 Hz
- Power Requirement: 50 Watts
- Fuse: 1 Amp, 250 Volts, Type 3AG
- Controls: Timer/Clock; Start/Stop time

### APPLICATIONS

The model 238900 Solubility System is suitable for a wide range of magnetic stirring applications where a test tube container is desired. The clock/timer can also be used independently for routine timing functions.

### CONSTRUCTION

The Solubility System is housed in a 2 piece aluminum enclosure. All operating controls are on the front panel, which is sloped for viewing while sitting or standing. Timer operation is automatic, and is controlled by the placement of the test tube. Presence of the test tube in the system starts the counter, which increments until the test tube is removed. Accumulated time is therefore always shown on the liquid crystal display. Timer reset and use of the clock functions are controlled by front panel buttons. Power is applied through a push

### CUSTOMIZATION

ATL can provide customization of its products, or the development of new products to meet specific customer requirements. Custom enclosures and interfaces, and special timing requirements are a few of the changes that can be requested. ATL is prepared to provide these services in a cost-effective manner and in a timely fashion.
