

Engineering Services

Advanced Technology Laboratories, Incorporated, is a Pennsylvania corporation that specializes in the design, development, and production of electronic and electromechanical systems. Since its inception in 1976, the company has consistently applied advanced techniques to give its customers a competitive edge in their complex business environments.

Engineering

- Product design analyses
- Electromechanical design
- Consulting services
- Technology reviews

Documentation

- Printed circuit board layout drawings
- Parts and wiring lists
- Printed circuit board artwork
- Cost reports
- Functional specifications

Technology Transfer

- Application of new technology
- Transfer from engineering prototype to production
- Utilization of new technologies in production

Microprocessor-based Systems

- Software design
- Hardware development
- System integration
- Design verification

ATL applies tomorrow's technology today
